This is the REVTEX 4 Command and Options Summary. It details usage for many of the new commands and options that are available in REVTEX 4. Please see the REVTEX 4 Author’s Guide for complete information on how to use REVTEX 4. Class options for the \documentclass line are marked with square brackets. Environments are indicated by \begin{<env>} and always require a matching \end{<env>}.

### TABLE I: REVTEX 4 Command Summary

<table>
<thead>
<tr>
<th>REVTEX 4/\LaTeX \ce{2} Markup</th>
<th>Details and Usage</th>
</tr>
</thead>
<tbody>
<tr>
<td>[twocolumn]</td>
<td>Two column formatting.</td>
</tr>
<tr>
<td>[onecolumn]</td>
<td>Single column formatting.</td>
</tr>
<tr>
<td>[preprint]</td>
<td>Single column formatting with increased interline spacing.</td>
</tr>
<tr>
<td>[groupedaddress]</td>
<td>Group authors with same affiliations together.</td>
</tr>
<tr>
<td>[superscriptaddress]</td>
<td>Associate authors with affiliations via superscript numbers. Appropriate for collaborations or if several authors share some, but not all, affiliations.</td>
</tr>
<tr>
<td>[draft]</td>
<td>Mark overfull lines.</td>
</tr>
<tr>
<td>[amsfonts],[noamsfonts]</td>
<td>Load (don’t load) amsfonts package. Adds AMS font support.</td>
</tr>
<tr>
<td>[amssymb],[noamssymb]</td>
<td>Load (don’t load) amssymb package. Adds additional AMS symbols.</td>
</tr>
<tr>
<td>[amsmath],[noamsmath]</td>
<td>Load (don’t load) amsmath package. Adds AMS-\LaTeX features.</td>
</tr>
</tbody>
</table>

### Other Class Options

| [preprintnumbers],[nopreprintnumbers] | Control display of preprint numbers given by \preprint command. [preprintnumbers] is default for [preprint]; otherwise [nopreprintnumbers] is default. |
| [floatfix]                      | Invoke emergency processing to avoid the \LaTeX error "Too many unprocessed floats" or all subsequent floats being moved to the end of the job. REVTEX 4 will display a message recommending this option if warranted. |
| [bibnotes],[nobibnotes]         | Control location of author footnotes. Default varies with journal style. |
| [footinbib],[nofootinbib]       | Control location of footnotes. Default varies with journal style. |
REVTEX 4/\LaTeX\ 2ε Markup

\begin{itemize}
\item \texttt{[altaffilletter]}, \texttt{[altaffillsymbol]}
\item \texttt{[unsortedaddress]}
\item \texttt{[runinaddress]}
\item \texttt{[showpacs],[noshowpacs]}
\item \texttt{[showkeys],[noshowkeys]}
\item \texttt{[tightenlines]}
\item \texttt{[floats]}
\item \texttt{[endfloats]}
\item \texttt{[endfloats*]}
\item \texttt{[titlepage],[notitlepage]}
\item \texttt{[final]}
\item \texttt{[letterpaper],[a4paper],[a5paper]}
\item \texttt{[oneside],[twoside]}
\item \texttt{[fleqn]}
\item \texttt{[egsecnum]}
\item \texttt{[balancelastpage],[nobalancelastpage]}
\item \texttt{[raggedbottom],[flushbottom]}
\item \texttt{[raggedfooter],[noraggedfooter]}
\item \texttt{[byrevtex]}
\item \texttt{[citeautoscript]}
\item \texttt{[galley]}
\end{itemize}

Details and Usage

Use letters or symbols for $\texttt{[altaffiliation]}$ superscripts. $\texttt{[altaffillsymbol]}$ is default.

Like $\texttt{[groupedaddress]}$, but doesn’t combine authors together who share the same affiliations.

Like $\texttt{[groupedaddress]}$, but joins multiple affiliations together into a single sequence separated by commas.

Control display of PACS: line.

Control display of Keywords: line.

Single space manuscript (for use with $\texttt{[preprint]}$).

Position floats near call outs. Default.

Move all floats to the end of the document.

Move all floats to the end of the document and put each on a separate page.

Control appearance of title page.

Don’t mark overfull lines. Default.

Select paper size. $\texttt{[letterpaper]}$ is default.

Control book style layout. $\texttt{[oneside]}$ is default.

Flush displayed equations left.

Number equations by section.

Control $\texttt{[twocolumn]}$ balancing on last page.

$\texttt{[balancelastpage]}$ is default.

Control $\texttt{[twocolumn]}$ balancing. $\texttt{[flushbottom]}$ is default.

Control positioning of footer. $\texttt{[noraggedfooter]}$ is default.

Display “Typeset by REVTEX 4”.

Fix up spacing and punctuation when switching from non-superscript style citations to superscript citation styles. $\texttt{\cite}$ commands and associated spacing and punctuation should be as for the non-superscript style. Typeset in a single narrow column.

Frontmatter Commands

\begin{itemize}
\item \texttt{\title{<title>}} \texttt{\author{One Author}} \texttt{\surname{Lloyd Weber}}, \texttt{\surname{Mao}}
\item \texttt{\email{<optional text>}{author@any.edu}} \texttt{\homepage{<optional text>}{http://any.edu/homepage/}} \texttt{\altaffiliation{<optional text>}{affiliation information}}
\item \texttt{\thanks{text}}
\item \texttt{\collaboration{<The Collaboration>}}
\item \texttt{\affiliation{text}}
\item \texttt{\noaffiliation}
\item \texttt{\date{<date>}}
\item \texttt{\begin{abstract}}
\item \texttt{\pacs{<pacs codes>}}
\item \texttt{\keywords{<keywords>}}
\end{itemize}

The manuscript title.

Specify one author’s name.

Indicate which part of a name within $\texttt{\author{}}$ should be used for alphabetizing and indexing.

Specify an e-mail address for an author.

Specify a URL for an author’s web site.

Specify an alternate or temporary address for an author.

Additional information about an author not covered by the more specific macros above.

Specify a collaboration name for a group of authors. Requires $\texttt{\superscriptaddress}$ and should be placed after the authors.

Specify a single affiliation. Applies to all previous authors without a specified affiliation.

For an author or collaboration without an affiliation. Show the date on the manuscript. $\texttt{\date{\today}}$ gives the current date.

Start the manuscript’s abstract. Must appear before $\texttt{\maketitle}$ command.

PACS codes for manuscript. Multiple PACS codes should be specified together in a single $\texttt{\pacs}$ macro.

Suggested keywords for indexing.
\textsc{REVTeX} 4/\LaTeX 2e Markup

\texttt{\textbackslash preprint\{<report number>\}}

Details and Usage

Specify an institutional report number to appear in the upper-righthand corner of the first page. Multiple \texttt{\textbackslash preprint} macros may be supplied, but space may limit how many can appear.

\texttt{\textbackslash maketitle}

Sets the title/author/abstract block.

\texttt{\textbackslash section\{<heading>\}}, \texttt{\textbackslash subsection\{<heading>\}}, \texttt{\textbackslash subsubsection\{<heading>\}}, \texttt{\textbackslash section*\{<heading>\}}, \texttt{\textbackslash appendix}, \texttt{\textbackslash appendix*}, \texttt{\begin{acknowledgments}}, \texttt{\lowercase\{<text>\}}

\textbf{Sectioning Commands}

Start a new section or subsection.

Start a new section without a number.

Makes all following sections appendices.

Signifies there is a single appendix section to follow.

Start an Acknowledgments section. Note spelling.

Escape a letter or word from being uppercased in a top-level \texttt{\section} heading.

\texttt{\bibliography\{<bib file basename>\}}

\texttt{\bibliographystyle\{<bst stylefile>\}}

\texttt{\begin{thebibliography}}

\texttt{\bibitem\{<optional text>\}\{<key>\}}

\texttt{\cite\{<list of keys>\}}

\texttt{\onlinecite\{<key>\}}

\texttt{\bibinfo\{<tag>\}\{<text>\}}

\texttt{\url\{<url>\}}

\texttt{\eprint\{<e-print id>\}}

\texttt{\footnote\{<text>\}}

\texttt{\footnotemark\{<key>\}, \footnotetext\{<key>\}\{<text>\}}

\texttt{\label\{<key>\}}

\texttt{\ref\{<key>\}}

\texttt{\pageref\{<key>\}}

\textbf{Citation, Footnote, and Cross-referencing Commands}

Specify a list of .bib files in which to find references. Read in the resulting .bib file. For use with \textsc{BibTeX}.

Specify a \textsc{BibTeX} (bst) style file to use. APS journal options select the proper default (\texttt{apsrev} or \texttt{apstrmp})

Start the reference section (when not using \textsc{BibTeX}.

Specify a single reference. Cite one or more references. \texttt{<key> is same as that of \texttt{\bibitem}}.

For superscript style citations, place the corresponding number on the baseline rather than as a superscript. A pure markup macro that adds tagging information to the components of a reference. \textsc{REVTeX} 4 \textsc{BibTeX} style files automatically add them appropriately. Doesn’t affect the typesetting.

Typeset a URL (\textsc{REVTeX} 4 automatically loads \texttt{url.sty}). \textsc{BibTeX} styles automatically add this markup.

Typeset an e-print identifier. \textsc{BibTeX} styles automatically add this markup.

Create a footnote or endnote in bibliography depending on class options. \texttt{\footnote} within a table will create a footnote attached to the table.

In a table, allows for multiple items to share the note.

Label an item for cross-referencing. \texttt{\label} should appear within the argument of the cross-referenced item (e.g., \texttt{\section\{\label\{<key>\}...}} or \texttt{\caption\{\label\{<key>\}...}}).

Refer to an item labeled by \texttt{\label\{<key>\}}.

Refer to the page on which an item labeled by \texttt{\label\{<key>\}} appears.

\begin{equation}
\end{equation}

\texttt{\begin{equation}}

\texttt{\end{equation}}

\texttt{\{[,\}]}

\textbf{Math and Equation Commands}

\texttt{\$}

Display numbered one-line equation.

Display unnumbered one-line equation.

\texttt{\check}
\texttt{\tilde}
\texttt{\acute}
\texttt{\grave}
\texttt{\dot}
\texttt{\ddot}
\texttt{\breve}
\texttt{\vec}
\texttt{\xleftarrow}
\texttt{\xrightarrow}
\texttt{\overset}
\texttt{\underset}
\texttt{\lvert}
\texttt{\rvert}
\texttt{\vert}
\texttt{\Vert}
\texttt{\rVert}

Details and Usage

Display multiple equations together or a long equation that requires multiple lines. Use \texttt{widetext} environment for an equation that must span the page in two-column formatting.

Suppress numbering of an equation with \texttt{eqnarray}.

Display multiple equations with no equation numbering at all.

Alignment character for equations within \texttt{eqnarray}.

End a row in \texttt{eqnarray}.

Prevent a page break at this point in an \texttt{eqnarray}.

Label an equation or group of equations for cross-referencing.

Refer to an equation by its label (e.g., \texttt{Eq\textasciitilde(\textbackslash ref{<key>})}.

Specify an alternative labeling separate from the automatic numbering of equations. Requires \texttt{[amsmath]}. Non-italicized text within a math context. Requires \texttt{[amsmath]}. Do not use \texttt{\textbackslash rm}, \texttt{\textbackslash text{rm}}, or \texttt{\textbackslash mbox}.

**REVTeX 4/\LaTeX 2e Markup**

\DeclareMathOperator
\text
\boldsymbol
\sideset
\substack
\begin{subarray}
\mathfrak
\mathbb

**Details and Usage**

Declare a new math operator so that spacing and font is correct.

Words and phrases in display math.

Make symbol bold. Also available in bm.sty.

Sets subscripts and superscripts at the corners of a summation or product.

Create a stack of subexpressions (for example, stacked summation limits).

Like \text{substack}, but allows finer control of subexpression alignment.

Replaces \text{frak}.

Replaces \text{Bbb}.

**Font Commands**

\textbf{<text>}

\textit{<text>}

\textsl{<text>}

\textsc{<text>}

\textsf{<text>}

\textmd{<text>}

\textnormal{<text>}

\textup{<text>}

\texttt{<text>}

\mathit{<text>}

\mathbf{<text>}

\mathtt{<text>}

\mathsf{<text>}

\mathcal{<text>}

\mathfrak{<text>}

\textbb{<text>}

\bm{<text>}

Text boldface font.

Text italicixed font.

Text Roman font.

Text Slanted font.

Text Small Caps font.

Text Sans Serif font.

Text Medium Series font.

Text Normal Series font.

Text Upright Series font.

Text Typewriter font.

Math italics font.

Math boldface font.

Math typewriter font.

Math sans serif font.

Math calligraphic font.

Math fraktur font. Requires [amsfonts] or [amssymb].

Math blackboard bold font. Requires [amsfonts] or [amssymb].

Bold math symbols (Greek and other symbols). Requires \usepackage{bm}.

**Table Commands**

\begin{table}[<placement>]

\begin{table*}

\begin{ruledtabular}

\begin{tabular}

\begin{tabular*}{<width>}[<position>]{<column specs>}

\squeezetable

Start a table float environment set to the current column width. The placement options may be any combination of h, t, b, p, or ! signifying here, top, bottom, page, and “as soon as possible”, respectively. A placement option of H will allow a long table to break across pages. \LaTeX may not be able to honor placement requests.

Start a non-floating table environment set to the current page width. Will be deferred to the following page.

Adds Physical Review style double (Scotch) rules around a table and adjusts the intercolumn spacing.

The \tabular environment sets the positions and the number of columns (as well as alignment) in the table. Like \tabular*, but with a set width.

Set table in a smaller font smaller. Place this macro before the \begin{table} line and sandwich everything between \begingroup and \endgroup.
REVTEX 4/LATEX 2ε Markup

\begin{longtable}{<column specs>}
Create a table set to the current column width that spans more than one page or column. \texttt{usepackage\{longtable\}} required.

\begin{longtable*}{<column specs>}
Create a table set to the current page width that spans more than one page. \texttt{usepackage\{longtable\}} required.

\caption{<text>}
Adds a caption for the table.

\printtables
With \texttt{[endfloats]}, control where the held back tables actually appear.

\begin{turnpage}
Rotate a table or figure by 90 degrees (landscape mode). Will put figure or table on a page by itself. Requires \texttt{graphics} package.

Graphics Commands

\begin{figure}[<placement>]
Start a figure float environment set to the current column width. The placement options may be any combination of h, t, b, p, or ! signifying here, top, bottom, page, and “as soon as possible”, respectively. A placement option of H will allow a long table to break across pages. \TeX{} may not be able to honor placement requests.

\begin{figure*}
Start a non-floating figure environment set to the current page width. Will be deferred to the following page.

\includegraphics[<scale,rotation>]{figure file}
Defined by invoking either \texttt{usepackage\{graphics\}} or \texttt{usepackage\{graphicx\}}, the standard \LaTeX{} packages for calling in figures. \texttt{graphicx} is the same as \texttt{graphics}, but uses key-value pairs for optional arguments.

\usepackage{epsfig}
Provides an alternative interface to the \texttt{graphics} package similar to the epsf class option in REVTEX3.

\printfigures
With \texttt{[endfloats]}, control where the held back figures actually appear.

Miscellaneous Commands

\begin{widetext}
Change column width to be the page width. Will add guiding rules.

\twocolumngrid
Low-level switch to a two column layout.

\onecolumngrid
Low-level switch to a single page-wide column layout.

\protect
Protect a fragile command within a macro with a “moving” argument. \texttt{\caption} and \texttt{\footnote} are common macros that have moving arguments.

\frac{\texttt{numerator}}{\texttt{denominator}}
Create a fraction. Use in place of \texttt{\over}.
