

What are we doing about video?

John Womersley 3/14/02

- Posting of talks:
 - The Physics and ID group convenors, and the ADM, have been "strongly encouraged" to comply with the task force recommendation that talks must be posted an hour before the meeting.
- We are in the process of putting in place the standing videoconferencing committee that was recommended.
 - Still tweaking membership and charge

Fermilab's role

- **Capital improvements:**
 - there is \$50k budgeted in FY02 in the Particle Physics Division to improve D0's video rooms. Ron Lipton is leading this effort. The standing committee's input will be important.
 - Plan for now
 - Expand doghouse
 - Minor fixes to Far Side
 - Explore relocating 9th Circle to DAB3 (PPD preference)
- **Technician Support:**
 - we have approached the lab about getting an additional person in the PC support group who could work roughly half of his or her time on videoconference support. This is still at the informal discussion stage but we will proceed to make a formal proposal.

Document Server

- The committee recommended that a document and presentation archiving tool would help in making materials available electronically.
- We have started to look at candidates, so far two identified
 - the CERN document server
 - <http://cds.cern.ch>
 - the BTeV document database
 - Lynn Garren and Eric Vaandering
- Again, we'd like to involve the standing committee in this evaluation

All D0 meeting

Starts on: 15 March 2002

Location: Fermilab, 9th
Circle

Chair: [Weerts, H](#)

Description: *All D0 meeting*

15 March 2002

- | | | |
|----|--|--|
| A. | State of Video conferencing (30') | Mr. Video Himself
<i>(Video Associates)</i> |
| B. | A short introduction to the time of flight calibration of the muon system

Muon Calibration Status (30') (more information)
This text was put in the "description" box, to see where it ends up. | B.Wamus
<i>(Siberia Institute of Technology)</i> |
| C. | Snowmass 2001 review (15')

www.snowmass2001.org | Chris Quigg
<i>(Fermilab)</i> |
