

SAMGrid submission site upgrade instructions.

- 1) Upgrade jim_client to v2_1_53 : upd install jim_client v2_1_53 -G-c
- 2) ups tailor jim_client
 - 1) a) Agree on all defaults/or values specific to your setup + include myproxy choice.
 - 2) It will take some time to finish tailoring as new vdt installation is been transfered.
Please follow the message and be patient until done.
- 3) setup jim_client
- 4) sam_gsi_read_config.
Make sure that you have SAM_GSI_JIM_CLIENT_CERT_DIR variable set. Other wise , please do ups tailor sam_gsi_config specifically including jim_client setup.
- 5) grid-proxy-init , store_myproxy
- 6) add lcg_requirement_string to the SAMGrid MC jdl
essentially the value of the lcg_requirement_string can be LCG CE name or valid LCG broker requirement string.
- 7) The LCG infrastructure is handled by ccin2p3-grid1 station. Please set the station name in the JDL to ccin2p3-grid1.
- 8) Available sites are : Lancaster , IC , Clermont ferrand , Prague , Nikhef , Wuppertal (lots of batch system blackholes , poor sibmission efficiency).
