

L2 Global Update

- **only small changes (internal) since last update.**
- **started looking at output and found problems with CPS input so attention went there.**

L2 CPS Status

- symptom of trouble was phi distribution

L2 CPS Algorithm

Debugging Progress

- **found a few problems**
 - **calculation of position of center of clusters from inputs was done slightly wrong**
 - **matching between layers had edge effect problems**
 - **phi wraparound was not taken into account**
- **things look much better now**

New Phi Distribution
