# Data Taking for 10/30 – 11/5

Day	Delivered (pb <sup>-1</sup> )	Recorded (pb <sup>-1</sup> )	Eff. (%)	Comments
10/30 (Mon)	2.30	2.02	88	
10/31 (Tue)				 Shutdown
11/1 (Wed)				
11/2 (Thu)				
11/3 (Fri)				
11/4 (Sat)				
11/5 (Sun)				

10/30-11/5	2.30	2.02	88	
------------	------	------	----	--

# Shutdown activities

- Upgraded all AFEII power supplies.
- Installed AFEII boards in all axial CFT slots.
- Usual maintenance work on the muon systems.
  - Replaced FEBs.
  - Cleaned the HV service cards.
- Survey the detector.
- Upgraded the DAQ back-end software to take advantage of the clustering.
- Converted the CHW system from the distilled water only system to the one with propylene glycol-water mix.
  - During this process, one of the fuses for Cal PS blew.
- Opened up the detector to work on the Cal and the A-layer muon PDTs
