

PENNSTATE

## **AMANDA and IceCube Postdoctoral Positions**

The Penn State Particle Astrophysics group has open postdoctoral positions on the AMANDA and IceCube experiments situated at the South Pole. These positions present a rare opportunity to analyze data from an experiment which is an established leader in the field of ultrahigh energy neutrino astronomy and at the same time make important contributions to the design and construction of a new, approved experiment that will help define the field for years to come. Applications will be considered from Ph.D. physicists with strong backgrounds in particle astrophysics, particle physics, and related fields. Willingness to travel to the South Pole a must. Applicants should submit a C.V. and arrange to have three letters of recommendation sent to: [cowen@phys.psu.edu](mailto:cowen@phys.psu.edu) or Professor Cowen, Penn State Physics, 104 Davey Laboratory, PMB 244, University Park, PA 16802. Penn State is committed to affirmative action, equal opportunity and the diversity of its workforce.
