ESnet ECS H.323 Ad-Hoc Bridge Instructions

NOTE: All systems using this bridge MUST be registered with ESnet ECS

X=Any number
82X for 384 kps Video Switched (full screen)
83X for 384 kps Continuous Presence (4 quad)
898378ip to test audio and video on your H.323 system
(CP mode)

For example: 898378ip to test audio and video on your H.323 system (CP mode)

Any questions contact Sheila Cisko x4516 or <u>videoconf@fnal.gov</u>

If you're using a H.320/H.323 (ISDN/IP) Polycom system you <u>may</u> need to enter "ip" in the title and video number fields. Otherwise the system may try to dial ISDN rather than IP.
